

# Medtronic

AcQCross™ Qx Integrated Transseptal Dilator/Needle

## Zero exchange workflow

### Zero-in on Efficiency

The integrated needle/dilator design removes the need for needle and guidewire exchange.

### Procedure Versatility

Choose the AcQCross model which fits with your existing sheath preferences.

### Cross with Control

The sharp AcQCross needle only deploys when activated, designed for ease of control during transseptal puncture.

**Efficiency**

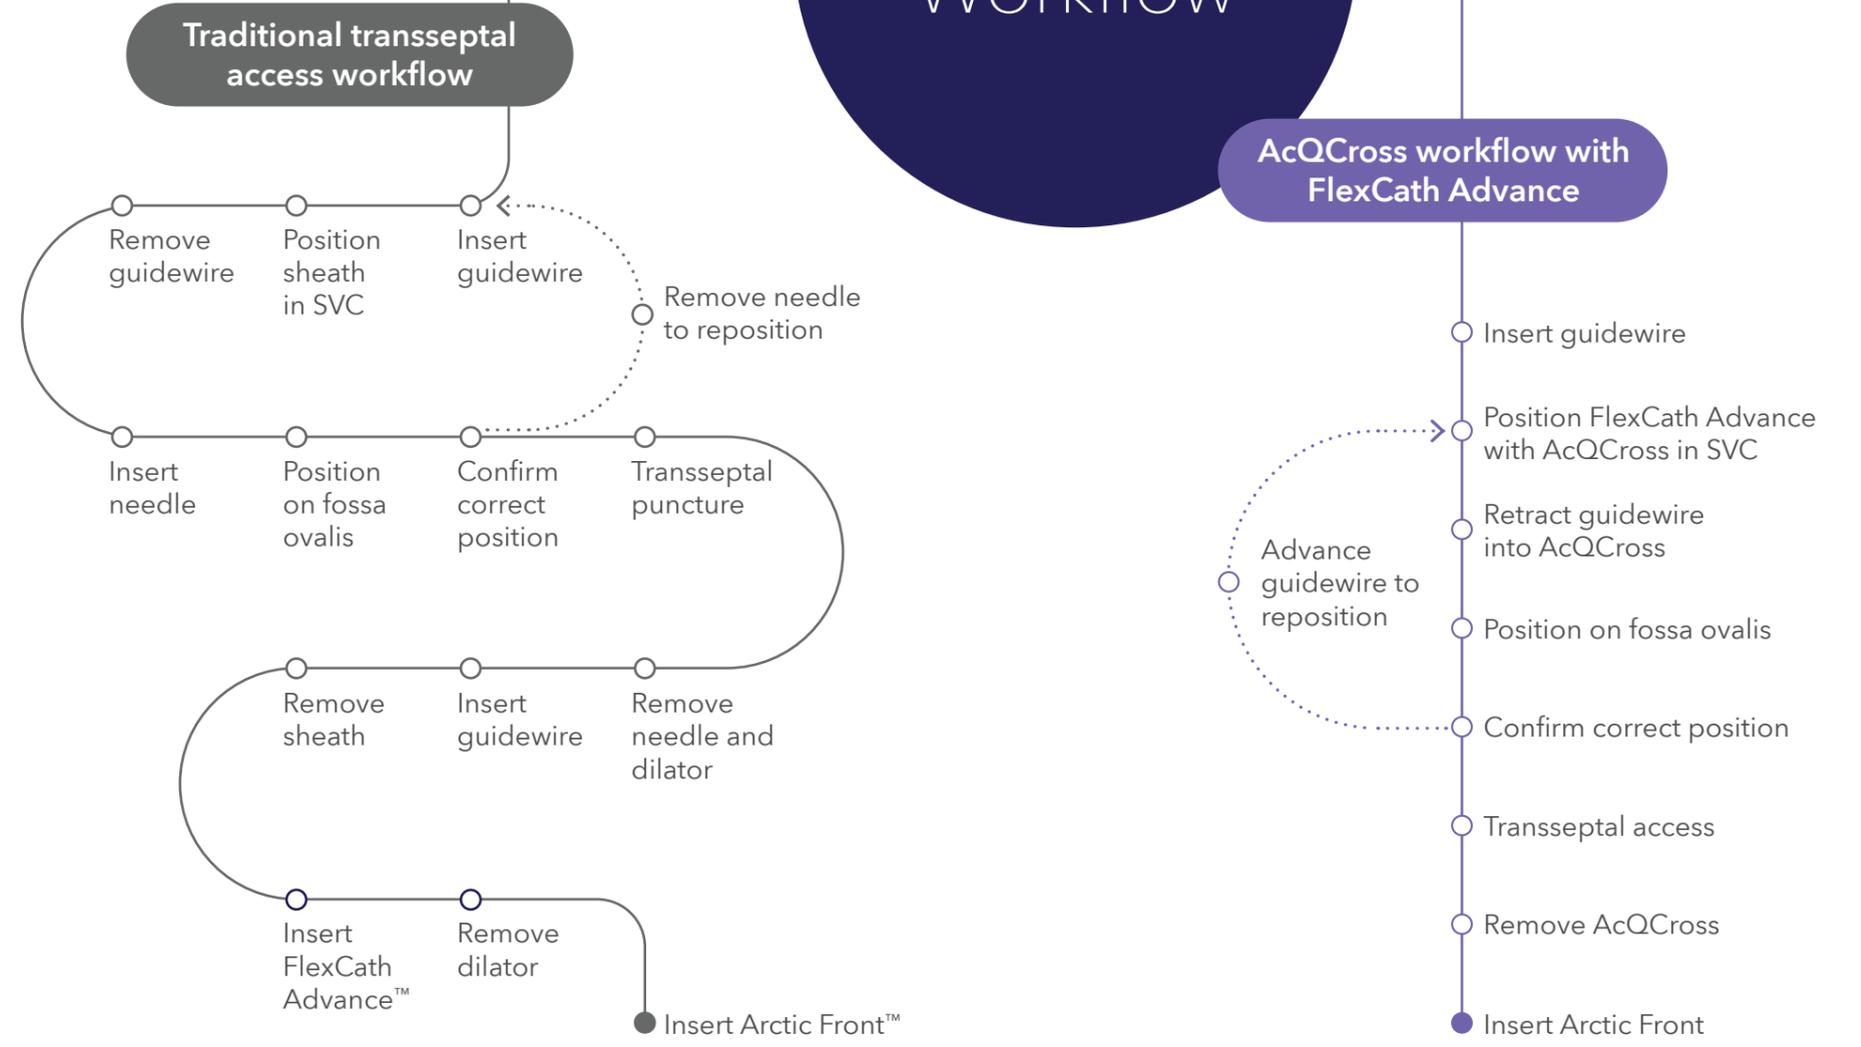

Zero exchange procedure

**Zero wire and needle exchange**

Integrated needle/dilator design removes the need for needle and guidewire exchange.

**Zero sheath exchanges**

Dilators compatible with leading industry sheaths eliminate the need for separate transseptal and therapeutic sheaths.

## Versatile

# Versatility for your procedures

Choose the AcQCross model which fits with your existing sheath preferences for your left-heart procedures. AcQCross is the only transseptal access system on the market **approved for both mechanical and RF crossing.**
